- ❑ Maritime Business and Commercial Operations to Port/Tanker Terminals, Agency Operations, Crew / Technical Management, Quality Management, and Rigorous Compliance Audits including ISM / NAV / Pre-SIRE / Pre-CDI / Pre-Purchase Audits.
- ❑ Vessel Management, Marine Technical Operations, presenting Subject Matter Expertise to Ensure Corporations Marine Operations are Conducted Safely, Reliably, Cost Effectively & Compliance with Appropriate Standards Inclusive of Planning, Executing, Value Engineering, Waste Reductions, Cost Control and Safety. Managed Technical Commercial Activities such as Project Cost for Retrofitting, New Machineries Installation, Budgeting Cost Effective Procurement, Estimation For Various Machineries and Engineering Activities On Board.. Performed Preventive Maintenance and Corrective Maintenance, Installation, Commissioning, Quality controls, Audits, Inspections and Trouble Shooting of Equipment.
- ❑ Carried Out Controlled Operation of the Vessels by Ensuring Safety of the Personnel Onboard and Compliance with all IMO / PSC / Flag State / Environmental/ Industry/Statutory standards and Regulations.
- ❑ Involved in Projects for Retrofitting and New Installation for BWTS, EGCS and Major Conversion in Dry Docks and Wet Docks.

Business Operation Ethics

Diversified Professional Business Approach

**THEOMNIVOLT**

WHERE POWER MEETS THE POTENTIAL

VISION

To emerge as a distinguished leader in the oil and gas sector by consistently exceeding expectations and upholding our commitments.

MISSION

Enriching the future by facilitating sustained and efficient distribution of petroleum products and services, making a lasting impact.

STRATEGIC APPROACH

- ◆ Strategically procure and ensure fuel supplies for clients.
- ◆ Diversify supply routes to mitigate single-source risks.
- ◆ Utilize storage facilities for income generation.
- ◆ Maintain uninterrupted fuel supply to the market.
- ◆ Foster global and regional partnerships in the industry.

TEAMWORK

- ◆ Respectful communication and collaboration are our foundations.
- ◆ We value individual contributions within a cohesive team.
- ◆ Embracing diverse perspectives to drive innovation.
- ◆ A culture anchored in integrity, respect, and teamwork.

COMMERCIAL EXCELLENCE

- ◆ Fostering a profit-driven, efficient business mindset.
- ◆ Implementing best practices for optimal performance.

TRUSTED PARTNER

- ◆ Building strong relationships with stakeholders.
- ◆ Promoting collaboration and mutual trust.
- ◆ Aligning with governments, partners, customers, and communities.

1. Ship Building

- At THEOMNIVOLT, we specialize in building next-generation vessels tailored to client-specific operational requirements.
- Our shipbuilding projects are executed in collaboration with globally accredited shipyards and classification societies.
- We deliver cost-effective and technically advanced ship designs, from concept to commissioning.
- Every vessel we build is a testament to innovation, durability, and maritime excellence.
- We focus on fuel efficiency, optimized hydrodynamics, and environmental compliance in our designs.
- Customization is at the heart of our shipbuilding service—whether commercial or offshore assets.
- We utilize advanced simulation tools and CAD software for precision in every build.
- Quality assurance protocols are strictly followed at every stage of construction.
- Our engineering team works closely with clients to incorporate operational insights into the design.
- We ensure timely delivery and sea-readiness, no matter the vessel size or type.
- We assist clients through classification, flag registration, and regulatory approvals.
- THEOMNIVOLT is committed to delivering vessels that perform under pressure and endure through decades.

THEOMNIVOLT

WHERE POWER MEETS THE POTENTIAL

2. Chartering

- We offer tailored chartering solutions, covering time, voyage, and bareboat charters.
- Our global chartering network connects shipowners with reputable charterers worldwide.
- We analyze market trends to negotiate the most competitive freight rates.
- THEOMNIVOLT facilitates dry and wet bulk cargo movements across continents.
- We provide strategic route planning and bunker optimization for cost-efficient operations.
- Our in-house legal support ensures watertight charter party agreements.
- We handle fixtures for tankers, bulk carriers, container ships, and offshore support vessels.
- Our chartering desk operates 24/7 to manage dynamic commercial operations.
- We maintain strong relationships with brokers, operators, and commodity traders.
- Our performance monitoring tools ensure voyage optimization and demurrage control.
- We cater to both spot market and long-term contracts with equal diligence.
- THEOMNIVOLT turns chartering complexity into seamless global logistics..

3. Sale & Purchase

- THEOMNIVOLT is a trusted name in the sale and purchase of newbuilds and second-hand vessels.
- We conduct technical inspections, valuation, and due diligence with utmost transparency.
- Our market intelligence ensures clients secure assets at optimal timing and pricing.
- We assist with contract negotiations, Memorandum of Agreement (MOA), and closing formalities.
- Vessel documentation and flag state requirements are handled by our in-house team.
- We coordinate dry-docking, pre-delivery surveys, and crew changeovers pre-purchase.
- Our services cover asset recycling, resale, and purchase of offshore units as well.
- We align S&P activities with client fleet strategies and market positioning.
- We maintain close ties with shipowners, yards, and financiers to access exclusive deals.
- Every transaction is conducted in compliance with international regulations and ethics.
- Post-sale support includes class transfer, name change, and vessel delivery logistics.
- With THEOMNIVOLT, buying or selling a vessel is secure, streamlined, and strategic.

Marine Services

4. **Ship-to-Ship (STS) Cargo Transfer**

- We offer safe and efficient STS operations globally, including oil, gas, and liquid cargoes.
- All operations are conducted in compliance with MARPOL and OCIMF guidelines.
- Our STS superintendents and mooring masters are certified and highly experienced.
- THEOMNIVOLT coordinates fendering, tug assistance, and cargo hoses for each transfer.
- We provide real-time weather routing and risk assessments to ensure safety.
- Locations are selected based on environmental safety, jurisdiction, and commercial viability.
- Our operations are supported with the latest communication and positioning systems.
- We offer both in-port and offshore STS transfer capabilities.
- Pre-STS and post-operation checklists are standardized for operational integrity.
- Emergency response plans are in place for every STS scenario.
- We cater to LNG, LPG, crude, clean products, and chemicals.
- THEOMNIVOLT delivers precision and professionalism in every STS operation.

5. **Decarbonization Management**

- THEOMNIVOLT supports vessel owners in achieving IMO decarbonization goals through practical, scalable solutions.
- We offer carbon footprint assessments and sustainability roadmaps tailored to each fleet.
- Our retrofitting solutions include energy-efficient propulsion systems and alternative fuels.
- We assist with the integration of wind-assist technologies, solar power, and hybrid systems.
- Regulatory compliance support is provided for EEXI, CII, and SEEMP regulations.
- We conduct feasibility studies for biofuels, LNG, methanol, and ammonia conversions.
- Our digital monitoring tools track fuel usage, emissions, and carbon intensity metrics.
- We facilitate access to carbon credits and ESG-aligned investment opportunities.
- Through decarbonization, we help improve vessel efficiency and asset longevity.
- We align sustainability strategies with commercial objectives for long-term gain.
- Training and awareness programs are provided to empower onboard and shore staff.
- At THEOMNIVOLT, we believe decarbonization is not a cost—it's a competitive edge.

Marine Services

6. *Technical Management*

- Our technical management ensures that vessels remain safe, compliant, and operationally efficient.
- We manage preventive and corrective maintenance, including class surveys and audits.
- Our systems ensure strict compliance with SOLAS, MARPOL, ISM, and other regulations.
- THEOMNIVOLT uses cutting-edge software to monitor fleet performance in real time.
- Planned maintenance systems (PMS) are customized for each vessel's operational profile.
- We supervise dry-dockings, repairs, and major retrofits globally.
- Spare parts procurement is optimized through our vendor network and cost controls.
- We provide round-the-clock technical support for urgent issues and breakdowns.
- Our technical superintendents are ex-Chief Engineers with vast hands-on experience.
- We maintain strict budget control while maximizing reliability and availability.
- Technical records are digitized and available for client access via secure portals.
- THEOMNIVOLT ensures that your fleet performs at its highest standard, always.

www.theomnivolt.biz

7. Crew Management

- We provide end-to-end crew management services including recruitment, certification, and logistics.
- Our seafarers undergo rigorous vetting and are sourced in compliance with STCW and MLC standards.
- We maintain a global database of certified officers, engineers, and ratings.
- THEOMNIVOLT ensures timely crew changeovers and travel coordination.
- Crew performance and retention are tracked using digital appraisal tools.
- We offer payroll management, insurance coverage, and tax compliance for multinational crews.
- Crew well-being and mental health support are prioritized through partner programs.
- Training and upskilling are continuous to match evolving regulatory demands.
- Our medical network provides pre-joining and repatriation support worldwide.
- We manage documentation, visa, and flag state endorsements seamlessly.
- Compliance with TMSA, OCIMF, and client-specific vetting is guaranteed.
- With THEOMNIVOLT, your crew is more than a resource—they're your frontline of success.

Marine Services

8. Repairs & Maintenance

- We provide global repair and maintenance services, from voyage repairs to major overhauls.
- Our riding squads can mobilize to vessels worldwide on short notice.
- We handle hull, machinery, piping, and electrical repairs with class-approved expertise.
- THEOMNIVOLT partners with shipyards and workshops across key maritime hubs.
- Emergency breakdown support is available 24/7 with rapid response teams.
- Maintenance schedules are planned based on usage analytics and OEM guidelines.
- Our teams carry out steel renewals, welding, turbocharger overhauls, and more.
- We minimize off-hire and downtime through strategic repair planning.
- Class and statutory documentation are maintained during all repair work.
- Spare parts logistics are streamlined via our global vendor network.
- Digital reporting with before/after photos and cost tracking are provided to clients.
- THEOMNIVOLT ensures your assets stay reliable, seaworthy, and profitable.

www.theomnivolt.biz

9. Dry Dock

- We manage comprehensive dry-docking services for all vessel types and sizes globally.
- THEOMNIVOLT ensures meticulous planning to reduce downtime and optimize yard time.
- Our team coordinates hull cleaning, blasting, painting, and class inspections.
- We work with accredited dry dock facilities in Asia, the Middle East, and Europe.
- Pre-docking assessments and budgets are transparently prepared for client approval.
- Our project managers are on-site throughout to oversee quality and safety.
- All steel repairs, piping, valve overhauls, and tank cleaning are conducted efficiently.
- We ensure compliance with IACS class societies and flag state requirements.
- Spare parts, consumables, and tools are sourced in advance to avoid delays.
- Daily progress reports and cost tracking are shared with clients in real-time.
- The vessel is thoroughly sea-trialed and class-approved before re-delivery.
- THEOMNIVOLT makes dry docking seamless, cost-efficient, and technically sound.

Marine Services

10. Pre-SIRE Inspection

- We conduct detailed pre-SIRE inspections to prepare tankers for OCIMF vetting.
- Our inspectors are experienced ex-Master Mariners and Tanker Superintendents.
- Every inspection is tailored to SIRE 2.0 guidelines, covering over 500 checkpoints.
- We review crew preparedness, SMS documentation, and equipment functionality.
- THEOMNIVOLT provides a comprehensive action plan to close identified gaps.
- Training is provided to the onboard team to boost readiness and confidence.
- Digital tools are used to streamline report generation and compliance mapping.
- Our insights improve your tanker's operational profile and inspection outcomes.
- We assist with follow-up inspections and vetting submission processes.
- Our goal is zero observations—maximizing charterability and vetting scores.
- We also support RightShip, CDI, and terminal-specific vetting as required.
- Trust THEOMNIVOLT to prepare your vessels for successful, high-standard inspections.

www.theomnivolt.biz

11. Vessel Audit

- We deliver technical, safety, and operational audits for vessels in both main fleet and offshore sectors.
- Our audits help benchmark vessel performance and compliance across international standards.
- Auditors are certified professionals with seagoing and ship management backgrounds.
- We evaluate SMS implementation, crew proficiency, ISM/ISPS/MLC compliance, and maintenance systems.
- THEOMNIVOLT provides a prioritized, risk-based audit report with actionable insights.
- Safety culture, incident reporting, and environmental practices are thoroughly reviewed.
- We conduct on-board and remote audits, depending on client preference.
- Our audit findings help reduce non-conformities and improve operational excellence.
- Specialized audits are also conducted for tankers, bulk carriers, and offshore units.
- Clients receive detailed audit trails and continual improvement suggestions.
- Follow-up audits are offered to ensure all corrective actions are closed.
- With THEOMNIVOLT, auditing is more than a check—it's a catalyst for performance.

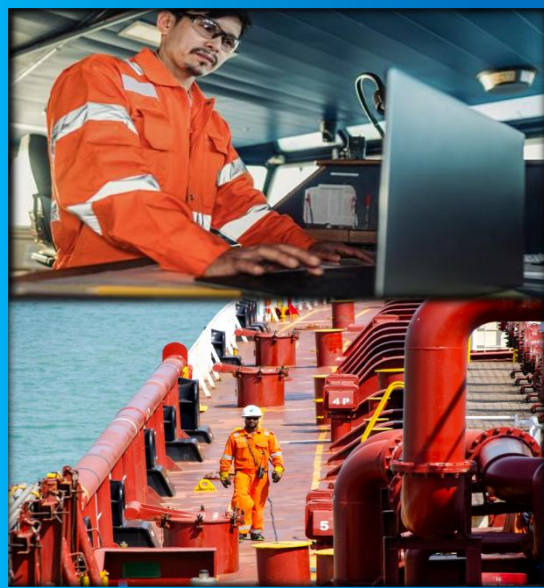

Marine Services

12. Tanker Management Self Assessment (TMSA)

- We support tanker operators in achieving TMSA excellence through structured assessments.
- Our IT-based TMSA platform helps digitize self-assessments and evidence tracking.
- THEOMNIVOLT provides gap analysis across the 13 TMSA elements.
- We align client systems with OCIMF requirements and oil major expectations.
- Our consultants guide clients through Levels 1 to 4 of TMSA implementation.
- Cybersecurity, digital voyage planning, and data integrity are core focus areas.
- We help establish KPIs, training records, and audit logs within digital systems.
- Integrated dashboards visualize performance trends and risk areas.
- Our IT tools are cloud-based, secure, and accessible across platforms.
- We ensure robust documentation and transparency for vetting inspections.
- We also assist with bridging TMSA with ESG and decarbonization metrics.
- THEOMNIVOLT turns TMSA from a compliance checklist into a competitive advantage..

www.theomnivolt.biz

13. Agency & Husbandry Service

- We offer full-scale port agency and husbandry services at major ports globally.
- Our local agents ensure smooth berthing, pilotage, and cargo clearance processes.
- Crew welfare services include hotel bookings, medical visits, and transfers.
- THEOMNIVOLT arranges fresh provisions, bonded stores, and technical supplies efficiently.
- Cash-to-Master and documentation handling are managed with full transparency.
- Our 24/7 port coordination reduces turnaround time and mitigates disruptions.
- Vessel declarations, customs, and immigration formalities are handled professionally.
- We liaise with port authorities to ensure timely port entry and departure.
- Ship spares and parcels are cleared and delivered onboard without delay.
- We provide real-time updates to owners and charterers throughout port calls.
- Compliance with local regulations and international standards is guaranteed.
- THEOMNIVOLT ensures peace of mind at every port—so your voyage stays on course.
